Health Links Steering Committee for the Kenora	Regular and timely access to primary care for complex patients											
Sub-Region	A central goal of Health Links continues to be regular and timely access to primary											
, and the second	care providers. As most client/patients first interaction with the health care system is											
	through their primary care provider, ensuring client/patients are attached to primary											
	care providers is essential to the effective provision of coordinated care for all of Ontario's complex client/patients.											
	Effective provision of coordinated care for all of Ontario's complex patients											
	The focus of Health Links has not changed; the model is scaling up to reach all of											
	Ontario's target population.											
	Consistent, quality care across the health care continuum and social services sectors											
	Making the connection between the services Health Links provide and their											
	connection to health, social, and community services.											
	4. Focus on vulnerable populations (frail and elderly, mental health and addictions and	1										
	palliative)											
	Health Links will capitalize on the work already being done to serve the complex											
	client/patient population, and focus in on the most vulnerable and marginalized within											
	that group.  5. Evidence-based, measureable improvement of the patient experience through											
	enhanced transitions in care											
	<ol><li>Maximize coordinated care to generate system value, sustain the Health Links</li></ol>											
	Model and strengthen care coordination processes to realize greater efficiencies											
	7. LHINs accountability for performance											
	LHINs provide oversight of Health Links and are accountable to the ministry for Health Links performance. LHINs will devise their regional Health Links strategy within their	1										
	boundaries and ensure that Health Links have the supports they need to succeed.											
	8. Shared MOHLTC, LHIN and Health Links accountability for overall success											
	The ministry, LHINs and Health Links will work together to ensure that Health Links											
	continue to make positive impacts for client/patients and the system.
